Common Explanation (1-5):

Reference:

Ten persons A, B, C, D, E, F, G, H, I and J are marketing executives of a mobile company in ten different cities i.e Agra, Bhopal, Ropar, Raipur, Pune, Ambala, Ranchi, Dispur, Indore and Moga. They are sitting around a rectangular table which has four seats each on the longer side and one seat each on the shorter side. All the persons are sitting at equal distances and facing one of the persons sitting on the opposite side. They are sitting in such a way that four persons are facing north, four are facing south, one is facing west and one is facing east.

Inference:

According to this reference the arrangement of person and their face will be like-

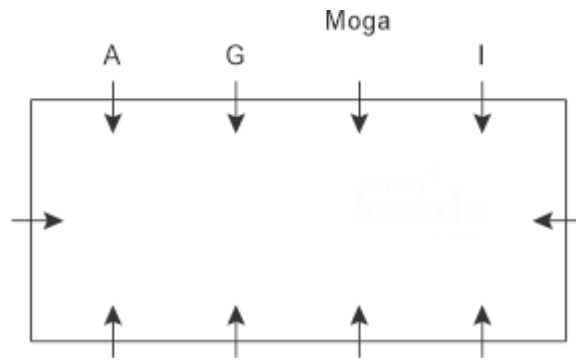

Reference:

Executive from Moga is the immediate neighbour of G and I and they are facing the south direction. G is sitting opposite C. I is sitting third to the left of A on the same side of the table.

Inference:

As I, G, A and an executive from Moga all are facing the south direction and I is sitting third to the left of A. We get following arrangement-

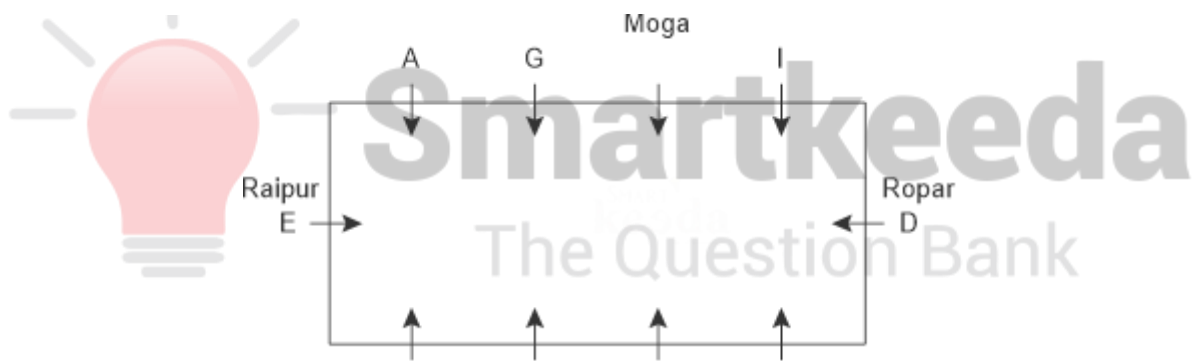

Reference:

D is sitting on the shorter side of the table and is sitting opposite the executive from Raipur.

E who is facing east direction is sitting opposite executive from Ropar.

From these two reference now we get following arrangement-

Reference:

G is sitting opposite C.

C is not an executive from Ranchi.

The executive from Ranchi is facing north and is the immediate neighbour of the executives from Ambala and Agra on the same side of table.

J is sitting opposite the executive from Indore and he is the immediate neighbour of the executive from Ambala.

Inference:

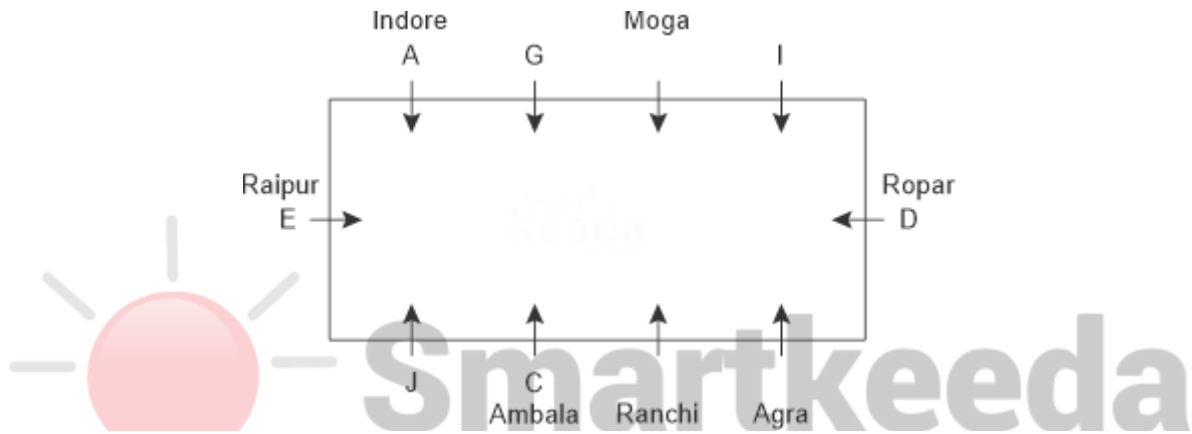

C sits opposite of G.

As C is not an executive from Ranchi then The executive from Ranchi will sit immediate right of C (only possibility)

As J is immediate neighbour of the executive from Ambala then executive from Ambala will sit immediate left of executive from Ranchi.

The executive sits opposite of J is from Indore.

Now, we get the following arrangement-

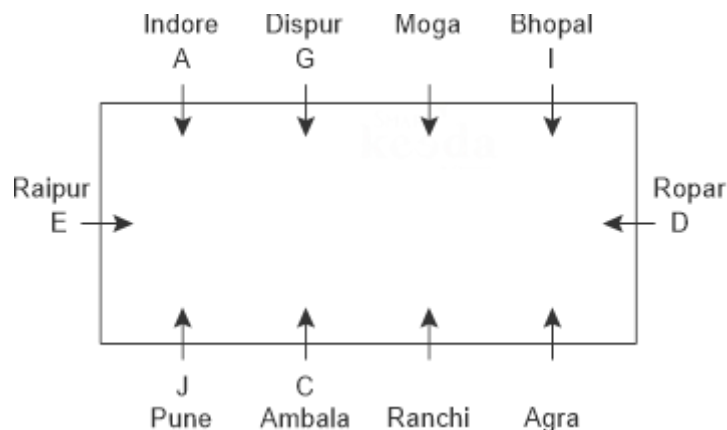

Reference:

Executives from Bhopal and Pune are sitting diagonally opposite each other.

Only one person is sitting between the executives from Dispur and Bhopal on the same side of table.

Applying these two condition we get-

Reference:

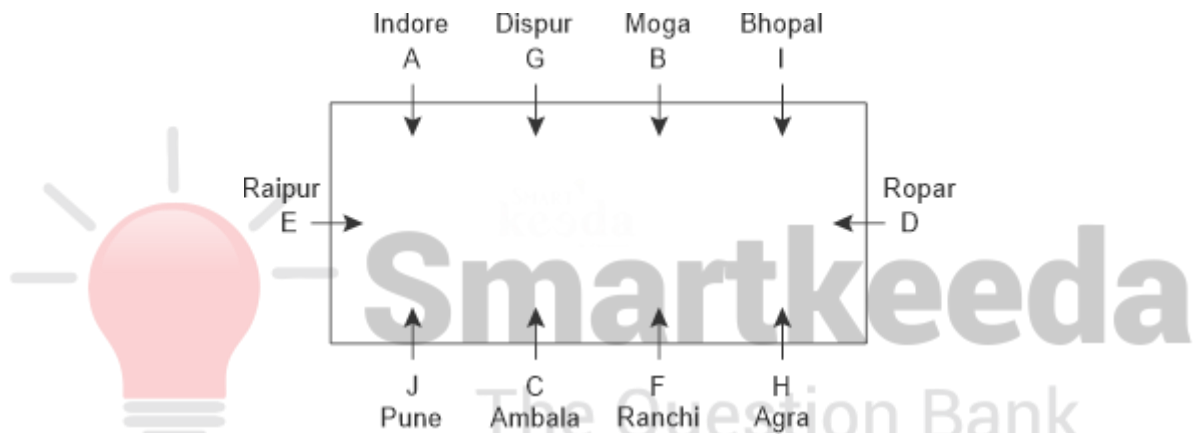

B sits third to the right of H.

Inference:

Only possibility that H is from Agra and B is from Moga.

And the only person left that is F is from Ranchi.

We get now the final arrangement-
