Answers :

1. From common explanation we get,

Step III: 63 **nworging** 51 mushrooms were **42** sides 36

'42' is 4th to the right of nworging, which is 2nd element from the left end.

Hence, option B is correct.

2. From common explanation we get,

Step IV: smoorhsuming 63 nworging **51** were 42 sides **36** 1st number from the right end = 36

The number immediate right of 'nworging' = 51

Addition = $36 + 51 = 87$

Hence, option A is correct.

3. From common explanation we get,

Step VI: **sedising** 72 smoorhsuming **63** nworging 51 were 42

Third to the left

Hence, option B is correct.
